## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 9-14 and 21- 29 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

As per claim 9 applicant claims steps of receiving a major axis and a minor axis and computing and modifying a logratio value. As per claim 21 applicant claims steps of combining a programmable value and determining the number of texture samples. Said steps are merely descriptive material without reaching a final result as being useful, concrete and tangible.

Claim0- 14 and 21- 29 are also rejected under 35 U.S.C. 112, first paragraph. Specifically, since the claimed invention is not supported by either a specific and substantial asserted utility or a well established utility for the reasons set forth above, one skilled in the art clearly would not know how to use the claimed invention.
